karljmorand@gmail.com

Team-focused web developer eager to solve problems. I relish interesting and unexpected challenges and view complex problems as an opportunity to grow as a developer.

`JavaScript` `Angular` `MongoDB`

`HTML & CSS` `Express` `PostgreSQL`

`Node.js` `Ruby on Rails` `jQuery`

Experience

General Assembly / Web Development Immersive
June 2016 - Present, Remote
Full stack web development program focused on common best practices in object-oriented programming, MVC frameworks, data modeling, and version control. Developed a portfolio of individually focused and collaboratively focused projects including:

- **Job Search App**
  MEAN stack app that uses LinkedIn's JavaScript SDK for user authentication and the GitHub Jobs API for job search.
- **User Forum App**
  Forum that allows users to securely create an account, make new posts, comment on other people's posts, and 'like' posts. The database is MongoDB and bcrypt is used for password encryption.
- **Shared To-Do List**
  MEAN stack app that allows users to create multiple to-do lists and share them with another user. Changes made by the shared user are automatically synced to the creator's copy of the list.

Podcast Producer
Dec 2012 - June 2016, New York City / Amman, Jordan
Produced, edited, and monetized podcasts focused on international relations, the Middle East, and veteran's issues such as Middle East Week, Task & Purpose Radio, and Arms Control Wonk.

US Army / Infantry Team Leader
Sep 2005 - Jan 2010, North Carolina / Iraq
Served two tours in Iraq as an infantry team leader. I was responsible for various aspects of mission planning and execution, as well as the welfare of 3-7 soldiers.

Education

Fordham University / BA
May 2010 - June 2013, New York City
Using the GI Bill I completed a degree in international studies focused on the Middle East with a minor in economics.
